Research Papers

Crude tea extracts decrease the mutagenic activity of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine in vitro and in intragastric tract of rats (MTR 04662)
A.K. Jain, K. Shimoi, Y. Nakamura, T. Kada, Y. Hara and I. Tomita (Japan) 1

Humic acids inhibit the formation but not the mutagenicity of *N*-methyl-*N*-nitrosourea (MTR 04663)
S.A. Badaev, T. Gichner, F. Pospíšil and J. Velemínský (U.S.S.R., Czechoslovakia) 9

Influence of *dam* and mismatch repair system on mutagenic and SOS-inducing activity of methyl methanesulfonate in *Escherichia coli* (MTR 04665)
C. Janion, S. Plewako, K. Bębenek and E. Sledziewska-Gojska (Poland) 15

Case–control cytogenetic study in offspring of mothers treated with bromocriptine during early pregnancy (MTR 04666)
A. Czeizel, R. Kiss, K. Rácz, K. Mohori and E. Gláz (Hungary) 23

Cloning of in vivo-derived thioguanine-resistant human B cells (MTR 04667)
M. Hakoda, Y. Hirai, Y. Kusunoki and M. Akiyama (Japan) 29

Repair capacity of fertilized mouse eggs for X-ray damage induced in sperm and mature oocytes (MTR 04668)
Y. Matsuda and I. Tobari (Japan) 35

Constitutive heterochromatin polymorphism and chromosome damage in viral hepatitis (MTR 04669)
B. Chatterjee and P.K. Ghosh (India) 49

Normal uracil-DNA glycosylase activity in Bloom's syndrome cells (MTR 04672)
J.A. Vilpo and L.M. Vilpo (Finland) 59

Frequency and distribution of *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine (MNNG)-induced structural chromosome aberrations in fibroblasts from sarcoma and non-Hodgkin's lymphoma patients (MTR 04673)
F. Mertens and B. Johansson (Sweden) 63

On the glucose effect in acridine-induced frameshift mutagenesis in *Escherichia coli* (MTR 04675)
F.W. Pons and P. Müller (F.R.G.) 71

Influence of metabolic factors on the mutagenic effectiveness of cyclophosphamide in *Drosophila melanogaster* (MTR 04676)
J.A. Zijlstra and E.W. Vogel (The Netherlands) 79

On the possible role of cytosine deamination in delayed photoreversal mutagenesis targeted at thymine–cytosine dimers in *E. coli*
M. Ruiz-Rubio and R. Bockrath (U.S.A.) 93

Molecular analysis of spontaneous and ethyl methanesulphonate-induced mutations of the *hprt* gene in hamster cells (MTR 04678)
J. Thacker and A.N. Ganesh (Great Britain) 103

Influence of *uvrB* and pKM101 on the spectrum of spontaneous, UV- and γ-ray-induced base substitutions that revert *hisG46* in *Salmonella typhimurium* (MTR 04679)
E. Eisenstadt, J.K. Miller, L.-S. Kahng and W.M. Barnes (U.S.A.) 113

Nucleic acid binding and mutagenicity of active metabolites of 2-amino-3,8-dimethylimidazo[4,5-*f*]quinoxaline (MTR 04680)
C. Negishi, Z. Yamaizumi and S. Sato (Japan) 127

Lethal and mutation frequency responses of *Spiroplasma citri* cells to UV irradiation (MTR 04681)
J. Labarère and G. Barroso (France) 135

Long-term, low-dose benzo[α]pyrene-induced mutation in human lymphoblasts competent in xenobiotic metabolism (MTR 04682)
S.L. Danheiser, H.L. Liber and W.G. Thilly (U.S.A.) 143

Lack of *umuDC* gene functions in *Vibrio cholerae* cells (MTR 04685)
S.K. Ghosh, D.K. Panda and J. Das (India) 149

After a single treatment with EMS the number of non-colony-forming cells increases for many generations in yeast populations (MTR 04686)
F. Klein, A. Karwan and U. Wintersberger (Austria) 157

Modes of genotoxicity of a macromolecular antibiotic, SN-07, a novel type of interstrand DNA cross-linker (MTR 04687)
N. Yajima, S. Ishida, N. Miyata, T. Kishi and G. Kawanishi (Japan) 165

The response of spermatogonia and spermatocytes of the Northern vole *Microtus oeconomus* to the induction of sex-chromosome nondisjunction, diploidy and chromosome breakage by X-rays and fast fission neutrons (MTR 04688)
A.D. Tates, N. de Vogel, A.H.M. Rotteveel, F. Leupe and J.A.G. Davids (The Netherlands) 173

Micronucleus formation in 2-cell embryos after in vitro X-irradiation of mouse spermatozoa (MTR 04689)
S. Pampfer, C. Streffer and W.-U. Müller (F.R.G.) 191

Induced recombination between duplicated *neo* genes stably integrated in the genome of CHO cells (MTR 04690)
D. Hellgren, H. Luthman and B. Lambert (Sweden) 197

On the nature of suppression by *Escherichia coli* HF4714 (MTR 04691)
R.W. Chambers (Canada) 207

Ataxia-telangiectasia: a variant with altered in vitro phenotype of fibroblast cells (MTR 04683)
Y. Ziv, A. Amiel, N.G.J. Jaspers, A.I. Berkel and Y. Shiloh (Israel, The Netherlands, Turkey) 211

The induction of revertants by heavy particles and γ-rays in Salmonella tester strains (MTR 04684)
S. Kozubek, E.A. Krasavin, K.G. Amirtayev, B. Tokarova, I. Soska, V. Drasil and M. Bonev (U.S.S.R., Czechoslovakia) 221

Effect of dietary fibre on the mutagenicity and distribution of 2-amino-3,4-dimethylimidazo[4,5-*f*]quinoline (MeIQ) (MTR 04692)
A.J. Howes, I.R. Rowland, B.G. Lake and A.J. Alldrick (Great Britain) 227

Shuttle vector system for the analysis of mutational events in mammalian chromosomal DNA (MTR 04693)
H. Ikehata, H. Kimura and T. Kato (Japan) 237

Protective effect of hydroxychavicol, a phenolic component of betel leaf, against the tobacco-specific carcinogens (MTR 04694)
A.J. Amonkar, P.R. Padma and S.V. Bhide (India) 249

Liquid holding increases mutation induction by formaldehyde and some other cross-linking agents in *Escherichia coli* K12 (MTR 04695)
J.A. Zijlstra (The Netherlands) 255

Mutagenicity of the phenolic microsomal metabolites of 3-nitrofluoranthene and 1-nitropyrene in strains of *Salmonella typhimurium* (MTR 04696)
M.C. Consolo, M. Anders and P.C. Howard (U.S.A.) 263

The role of short-lived lesions in the induction of micronuclei in rat liver by ethylnitrosourea and methyl methanesulphonate: the importance of experimental design (MTR 04697)
A.D. Tates and L. Den Engelse (The Netherlands) 271

X-Ray-induced specific-locus mutations in the *ad-3* region of two-component heterokaryons of *Neurospora crassa*. II. More extensive genetic tests reveal an unexpectedly high frequency of multiple-locus mutations (MTR 04698)
F.J. De Serres (U.S.A.) 281

Gene deletion, a mechanism of induced mutation by arabinosyl nucleosides (MTR 04699)
P. Huang, M.J. Siciliano and W. Plunkett (U.S.A.) 291

Low persistence of the induced mutant phenotype in Chinese hamster cells (MTR 04700)
W.E.C. Bradley and F. Laviolette (Canada) 303

Chromosome malsegregation and embryonic lethality induced by treatment of normally ovulated mouse oocytes with nocodazole (MTR 04701)
W.M. Generoso, M. Katoh, K.T. Cain, L.A. Hughes, L.B. Foxworth, T.J. Mitchell and J.B. Bishop (U.S.A.) 313

Lack of effect of maternal age on UV-induced DNA repair in mouse oocytes (MTR 04702)
C.L. Guli and D.R. Smyth (Australia) 323

Effects of 50-Hertz electromagnetic fields on proliferation and on chromosomal alterations in human peripheral lymphocytes untreated or pretreated with chemical mutagens (MTR 04703)
M. Rosenthal and G. Obe (F.R.G.) 329

Fetal anomalies produced subsequent to treatment of zygotes with ethylene oxide or ethyl methanesulfonate are not likely due to the usual genetic causes (MTR 04704)
M. Katoh, N.L.A. Cacheiro, C.V. Cornett, K.T. Cain, J.C. Rutledge and W.M. Generoso (U.S.A.) 337

Detection of 6-thioguanine resistance in human peripheral blood lymphocytes (PBL) of industrial workers and lung cancer patients (MTR 04705)
A. Tompa and E. Sapi (Hungary) 345

Hprt mutations and karyotype abnormalities in T-cell clones from healthy subjects and melphalan-treated ovarian carcinoma patients (MTR 04706)
S.-M. He, K. Holmberg, B. Lambert and N. Einhorn (Sweden) 353
